luis ignacio cejudo fontes - Logical ability

Alva's logic test assesses logical ability, i.e., how efficiently one processes complex information and draws accurate conclusions from it.

Slightly above average

69th - 84th percentile.

Your score on the logic test is 7, which is slightly above average.

Alva Labs interprets logical ability by benchmarking your score against *others* in the working population. A score of *slightly above average* indicates a person often requires less time and effort to interpret abstract information and form logical conclusions. People with similar scores often experience they can easily acquire and apply new knowledge, provided the topic is not complicated.

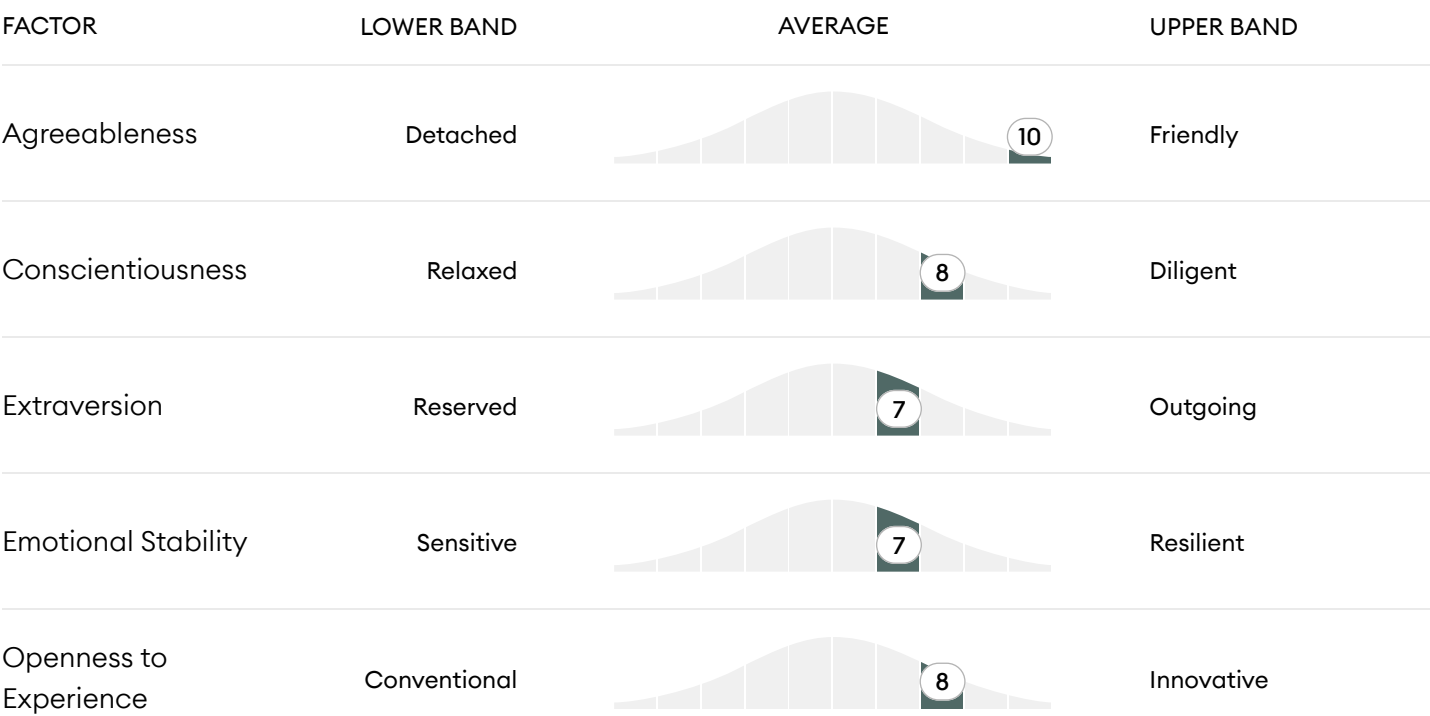

Keep in mind when interpreting your results that *logical ability is far from the only factor* determining job performance or career success. Personality, motivation, values, and experience are also important, and strengths in one area *may outweigh weaknesses* in another.

* The most common standard scores are 5 and 6. The percentile ranges for these scores are wide due to the fact that they cover a large proportion of the population.
